Portfolio: rahul-s-professional-portfolio-hrdc738nn.vercel.app

SUMMARY

Final-year B.Tech CSE student (2027) with two Java internships, building REST APIs, microservices and React applications with Java, Spring Boot, MySQL and Apache Kafka. Built a role-based platform for **500+ concurrent users** with **40%+ faster queries** and an event-driven Kafka microservice (JPMorgan Chase Job Simulation). HackerRank certified in SQL (Advanced) and Java (Basic).

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript
Backend: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, Microservices, Apache Kafka
Frontend: React, HTML5, CSS3, Tailwind CSS, Bootstrap
Databases: MySQL, H2, Schema Design (3NF), Indexing and Query Optimization
Tools: Git, GitHub, Maven, Postman, JUnit, IntelliJ IDEA
Core CS: DSA, OOP

EXPERIENCE

Java Full Stack Intern, Adyapan | Jul 2026 - Aug 2026
Employee Management System | Live: employee-management-system-yuzi.onrender.com

- Developed a full-stack Employee Management System (CRUD) in a **45-day project** using Java, Spring Boot, Spring Data JPA, Hibernate, Thymeleaf and MySQL.
- Designed the MySQL schema with JPA entities and foreign-key relationships to model employee data.
- Implemented bean validation and global exception handling in Spring Boot, and built a Bootstrap UI for end users.

Java Intern, Adyapan | May 2026 - Jun 2026

- Developed a console-based Retail Store and Order Management System in Java covering products, customers, orders, billing (discount and tax), payments and reports.
- Applied OOP with interfaces and polymorphism for Cash, Card and UPI payments, using enums, service classes, Collections and custom exceptions.

PROJECTS

ScholarSpace - Academic Resource Management Platform | Aug 2025
Live: scholarspace-main.vercel.app | GitHub: github.com/Rahul-web01/Scholarspace-main
Java, Spring Boot, MySQL, REST API, HTML, CSS, JavaScript

- Built a Spring Boot REST API backend for a multi-role platform (admin, faculty, student) supporting **500+ concurrent users**.
- Designed a normalized MySQL schema (3NF) and improved query performance by **40%+** using indexing and optimized joins.
- Implemented role-based access control (RBAC) for tiered admin, faculty and student permissions.

Midas Core - Kafka-Based Transaction Processing Microservice | Jun 2026
GitHub: github.com/Rahul-web01/midas-core
Java, Spring Boot, Apache Kafka, Spring Data JPA, H2 | JPMorgan Chase Job Simulation (Forage)

- Developed an event-driven Spring Boot microservice that consumes high-volume transaction messages from Apache Kafka.
- Implemented transaction validation, persistence and balance-update logic using Spring Data JPA and H2.
- Integrated an external Incentive REST API using RestTemplate and exposed a JSON balance-query REST endpoint.

Real-Time Currency Converter | Jan 2026
Live: currency-exchange-dackf2w6x-rahuls-projects-98687e81.vercel.app
GitHub: github.com/Rahul-web01/Currency-Exchange-App
React, JavaScript, Tailwind CSS, REST API

- Built a responsive React application that fetches live exchange rates through a REST API for multi-currency conversion.
- Developed a custom hook and reusable components, optimized rendering with useCallback and useEffect, and deployed on Vercel.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering | 2023 - 2027 (Expected)
Babu Banarasi Das University, Lucknow, Uttar Pradesh

CERTIFICATIONS

- HackerRank: SQL (Advanced) and Java (Basic) | Jun 2026
- Software Engineering Job Simulation, JPMorgan Chase and Co. (Forage) | Jun 2026
- Technical Training Programs (2 x 90 hours), Learnovate Enterprises | Apr 2026, Sep 2026
- TCS iON: AI and Cybersecurity Awareness, YUVA AI For All | 2026

ACHIEVEMENTS

- Participated in Zomathon Data Hackathon (Coding Ninjas x Zomato), Nation Building Case Study Competition 2026 and AINCAT 2026.
