

RAHUL SINGH

Software Engineer | Java, Spring Boot, Microservices, REST APIs

Lucknow, Uttar Pradesh, India | +91 94523 33000 | contact.rahul82@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Detail-oriented Software Engineer with hands-on experience building RESTful APIs, event-driven microservices, and relational database systems using Java, Spring Boot, and Apache Kafka. Improved SQL query performance by over 40% through indexing and schema optimization, and delivered a platform supporting 500+ concurrent users. Completed the JPMorgan Chase Software Engineering Job Simulation, building a Kafka-based transaction-processing microservice. HackerRank-certified in SQL (Advanced) and Java, with a strong foundation in Data Structures, Algorithms, and Object-Oriented Programming.

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript

Backend & Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, JDBC

Architecture & Messaging: Apache Kafka, Microservices, Event-Driven Architecture, System Design

Databases: MySQL, H2 Database, RDBMS, Query Optimization

Cloud & DevOps: AWS (Cloud Practitioner - in progress), Git, GitHub, Maven, CI/CD, Linux

Tools & Practices: JUnit, Postman, IntelliJ IDEA, Agile/Scrum

PROJECTS & EXPERIENCE

Midas Core — Kafka-Based Transaction Processing Microservice

July 2026

JPMorgan Chase Software Engineering Job Simulation (Forage) | github.com/Rahul-web01/midas-core

- Built a Spring Boot microservice that consumes and deserializes high-volume transaction messages via Apache Kafka using an embedded test framework.
- Modeled relational entities and implemented transaction validation, persistence, and balance-update logic with Spring Data JPA and H2.
- Integrated an external REST Incentive API via RestTemplate and exposed a JSON balance-query endpoint through a Spring REST controller.

ScholarSpace — Academic Resource Management Platform

Aug 2025

Java, Spring Boot, MySQL, REST API | github.com/Rahul-web01/Scholarspace-main

- Architected a scalable REST API backend for a multi-role platform (admin, faculty, student) supporting 500+ concurrent users.
- Designed a normalized MySQL schema (3NF) and boosted high-frequency query performance by 40%+ through indexing and optimized joins.
- Implemented secure, role-based access control (RBAC) for tiered admin, faculty, and student permissions.

Real-Time Currency Exchange API

Jan 2026

Java, REST API Integration, JSON Parsing | github.com/Rahul-web01/Currency-Exchange-App

- Built a Java backend integrating third-party exchange-rate APIs for real-time multi-currency conversion.
- Implemented fault-tolerant JSON parsing with structured exception handling and retry logic for reliable API communication.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science & Engineering

2023 – 2027 (Expected)

Babu Banarasi Das University, Lucknow, Uttar Pradesh

Class XII (Science – PCM), Lucknow Public School and Colleges, UP, CBSE — 2017 – 2019

CERTIFICATIONS

- SQL (Advanced) — HackerRank
- Java (Basic) — HackerRank
- Communication Skills — TCS iON
- YUVA AI For All — TCS iON × IndiaAI
- AI & Cybersecurity Awareness — MPIT-CoE

ACHIEVEMENTS & COMPETITIONS

- Zomathon – Data Hackathon (Coding Ninjas × Zomato): applied data analytics and collaborative problem-solving to a real-world business case.
- NationBuilding Case Study Competition 2026 (Unstop) and AINCAT 2026 (Naukri Campus): competitive case-study and quantitative reasoning assessments.
